Day 5 | 双语阶段测试

原创模拟题，非官方真题。10道四选一题，训练用时20分钟，另留30分钟复盘；不是官方考试时长。覆盖截至该学习日的知识领域。

官方练习测验入口：https://cdmp.info/product/32612/ 。本次已读取产品说明，未取得官方题目正文，不转载或声称收录官方真题。

题目（英文）

1. Two teams report different revenue totals because they use different definitions. What should be resolved first?

A. Decision rights and an approved business definition

B. Disk capacity

C. Dashboard colors

D. Backup frequency

2. A team wants to collect more personal attributes merely because storage is cheap. What is the best response?

A. Collect all available attributes

B. Assess purpose, necessity and possible harm

C. Remove all audit evidence

D. Assume encryption makes every use appropriate

3. An organization knows its target architecture but has many legacy dependencies. What deliverable connects the current and target states?

A. A supplier logo

B. An unlimited wish list

C. A phased roadmap with dependencies

D. A list of employee birthdays

4. A quality rule exists, but no one is accountable for approving changes. What is missing?

A. A larger spreadsheet

B. A different file extension

C. More server memory

D. An authorized owner and decision process

5. A data service is fast, but business users cannot interpret its fields. Which capability is most directly needed?

A. Business definitions and metadata stewardship

B. More parallel processing only

C. Fewer documented definitions

D. A faster network only

6. Which result best demonstrates data management value?

A. The highest number of tools

B. A verified reduction in business losses linked to improved data

C. The longest policy document

D. The largest raw data volume

7. An analyst can access a dataset but is asked to use it for an unexpected sensitive inference. What should happen?

A. Treat access as unlimited permission

B. Hide the new purpose

C. Assess and escalate the new use before proceeding

D. Skip all documentation

8. Which activity is governance rather than routine database operation?

A. Replacing a disk

B. Running a backup

C. Rebuilding an index

D. Approving a policy exception with conditions and an expiry date

9. A proposed architecture centralizes all data without considering business needs. What is the strongest concern?

A. The design lacks demonstrated business fit and trade-off analysis

B. Centralization is always illegal

C. Every distributed system is better

D. Only the diagram font matters

10. A control passes its technical test, but the business problem remains. What should the team do next?

A. Declare complete success

B. Review outcome measures and investigate remaining causes

C. Stop user feedback

D. Delete the baseline measures

答案、题目中文翻译与解析

1. 原题：Two teams report different revenue totals because they use different definitions. What should be resolved first?

中文翻译：两个团队因定义不同而报告不同收入总额，应首先解决什么？

【重点】答案：A | 知识领域：数据治理

解析：应先确定授权责任和业务口径。B容量、C颜色、D备份都不解决定义分歧。

2. 原题：A team wants to collect more personal attributes merely because storage is cheap. What is the best response?

中文翻译：团队仅因存储便宜就想多收集个人属性，最佳回应是什么？

【重点】答案：B | 知识领域：伦理

解析：应评估目的、必要性及潜在伤害。A无边界收集增加风险；C破坏证据；D把加密与用途适当混淆。

3. 原题：An organization knows its target architecture but has many legacy dependencies. What deliverable connects the current and target states?

中文翻译：组织已有目标架构但存在大量遗留依赖，什么交付物连接现状与目标？

【重点】答案：C | 知识领域：数据架构

解析：分阶段路线图解释迁移顺序与依赖。A和D无关；B缺少可执行步骤和优先级。

4. 原题：A quality rule exists, but no one is accountable for approving changes. What is missing?

中文翻译：已有质量规则，却无人对变更批准负责，缺少什么？

【重点】答案：D | 知识领域：数据治理

解析：问责与决策流程缺失。A、B只是载体变化，C解决性能而非授权。

5. 原题：A data service is fast, but business users cannot interpret its fields. Which capability is most directly needed?

中文翻译：数据服务很快，但业务用户不理解字段含义，最直接需要哪种能力？

【重点】答案：A | 知识领域：元数据与概述

解析：定义与元数据管理解决含义问题。B与D改善速度，C会加剧歧义。

6. 原题：Which result best demonstrates data management value?

中文翻译：哪项结果最能体现数据管理价值？

【重点】答案：B | 知识领域：数据管理概述

解析：有证据的业务损失改善比投入数量更接近价值。A工具、C篇幅、D体量均不能单独证明成效。

7. 原题：An analyst can access a dataset but is asked to use it for an unexpected sensitive inference. What should happen?

中文翻译：分析师可访问数据，却被要求用于未预期的敏感推断，应如何处理？

【重点】答案：C | 知识领域：伦理

解析：新增用途需核查影响与授权。A混淆访问与用途，B和D削弱透明和追责。

8. 原题：Which activity is governance rather than routine database operation?

中文翻译：哪项属于治理，而不是例行数据库操作？

【重点】答案：D | 知识领域：数据治理

解析：授权例外的条件和期限属于治理决策。A、B、C主要是技术运营。

9. 原题：A proposed architecture centralizes all data without considering business needs. What is the strongest concern?

中文翻译：某架构未考虑业务需求就集中所有数据，最主要的担忧是什么？

【重点】答案：A | 知识领域：数据架构

解析：应评估需求、成本、依赖和风险。B并非普遍法律结论，C绝对化，D忽视实质设计。

10. 原题：A control passes its technical test, but the business problem remains. What should the team do next?

中文翻译：控制已通过技术测试，但业务问题仍存在，团队下一步应做什么？

【重点】答案：B | 知识领域：数据管理概述

解析：技术测试覆盖有限，应结合业务结果继续分析。A过早结论；C与D损害反馈及比较依据。

【任务】记录题号、所选答案、知识领域与错因，区分英文理解问题和知识判断问题。成绩仅供学习诊断；80%可作为训练目标，不等同于官方通过概率。
