Day 10 | 双语阶段测试

原创模拟题，非官方真题。10道四选一题，训练用时20分钟，另留30分钟复盘；不是官方考试时长。覆盖截至该学习日的知识领域。

官方练习测验入口：https://cdmp.info/product/32612/ 。本次已读取产品说明，未取得官方题目正文，不转载或声称收录官方真题。

题目（英文）

1. An order contains many products and a product appears in many orders. What is an appropriate relational design?

A. Store all products as one unstructured string

B. Remove the product entity

C. Introduce an order-line association entity

D. Require each product to have only one order

2. The business tolerates at most ten minutes of lost data after a failure. Which objective expresses this?

A. RTO

B. Availability percentage only

C. Query latency

D. RPO

3. A backup job succeeds every day. What additional evidence is most important for recovery confidence?

A. A tested restoration with validated results

B. A shorter backup name

C. A more expensive disk alone

D. A colorful status icon

4. A user passes authentication. What must still be checked before a sensitive read?

A. Only whether the user knows the table name

B. Authorization for the resource and operation

C. Only the office location

D. Only the network speed

5. An API returns a successful status, but the financial totals disagree. What is needed?

A. Fewer logs

B. More interface colors

C. Business reconciliation and discrepancy investigation

D. Ignoring failed records

6. A payment message may be delivered twice. Which design reduces duplicate business effects?

A. More retries without tracking

B. Removing transaction identifiers

C. Skipping reconciliation

D. Idempotent processing with appropriate deduplication

7. An old contract template is repeatedly reused. What is the best control?

A. A controlled authoritative publishing point with version identification

B. More ungoverned shared folders

C. Removal of approval history

D. Random file names

8. A record has reached its normal disposal date but is under a valid hold. What should happen?

A. Delete it automatically

B. Suspend the relevant disposal and follow the authorized hold process

C. Change the file color and delete it

D. Let any user decide privately

9. Two systems use the field status with different meanings. What is most important before exchange?

A. Making both names uppercase

B. Buying more bandwidth

C. Agreeing semantic definitions and mapping rules

D. Changing the interface logo

10. A production schema change is proposed. What is the best preparation?

A. Deploy first and investigate later

B. Delete change records

C. Assume all consumers adapt automatically

D. Analyze dependencies, test compatibility and prepare a recovery path

答案、题目中文翻译与解析

1. 原题：An order contains many products and a product appears in many orders. What is an appropriate relational design?

中文翻译：订单含多个商品，一个商品出现在多个订单中，哪种关系设计合适？

【重点】答案：C | 知识领域：建模

解析：订单明细关联实体表达多对多及数量价格属性。A难以约束，B丢失实体，D违背业务。

2. 原题：The business tolerates at most ten minutes of lost data after a failure. Which objective expresses this?

中文翻译：业务最多容忍故障后丢失十分钟数据，哪项目标表达这一点？

【重点】答案：D | 知识领域：存储操作

解析：RPO表达可容忍数据丢失时间窗口。RTO是恢复时间，B不能直接表达丢失范围，C是查询性能。

3. 原题：A backup job succeeds every day. What additional evidence is most important for recovery confidence?

中文翻译：备份任务每天成功，什么额外证据最有助于确认可恢复？

【重点】答案：A | 知识领域：存储操作

解析：实际恢复验证内容、依赖与流程。名称、价格和图标都不能证明可恢复。

4. 原题：A user passes authentication. What must still be checked before a sensitive read?

中文翻译：用户已通过身份认证，读取敏感数据前仍需检查什么？

【重点】答案：B | 知识领域：安全

解析：认证确认身份，授权确认资源操作权限。表名、位置及速度不能替代授权。

5. 原题：An API returns a successful status, but the financial totals disagree. What is needed?

中文翻译：API返回成功状态，但财务总额不一致，需要什么？

【重点】答案：C | 知识领域：集成

解析：业务对账检查重复遗漏及转换差异。A减少证据，B无关，D造成缺失。

6. 原题：A payment message may be delivered twice. Which design reduces duplicate business effects?

中文翻译：付款消息可能投递两次，哪种设计减少重复业务效果？

【重点】答案：D | 知识领域：集成

解析：幂等和去重减少重复处理效果。A可能加重重复；B失去识别线索；C不能验证结果。

7. 原题：An old contract template is repeatedly reused. What is the best control?

中文翻译：旧版合同模板反复被使用，最佳控制是什么？

【重点】答案：A | 知识领域：文档内容

解析：权威发布和版本标识帮助找到当前批准版本。B加剧分散；C破坏证据；D降低检索。

8. 原题：A record has reached its normal disposal date but is under a valid hold. What should happen?

中文翻译：记录已到正常处置日期，但存在有效冻结要求，应怎么办？

【重点】答案：B | 知识领域：文档内容

解析：冻结是保留处置的重要例外，应按授权流程处理。A忽视例外，C无关，D缺乏问责。

9. 原题：Two systems use the field status with different meanings. What is most important before exchange?

中文翻译：两个系统的status字段含义不同，交换前最重要的是什么？

【重点】答案：C | 知识领域：集成

解析：语义互操作依赖定义映射。同名、带宽和图标不能建立共同含义。

10. 原题：A production schema change is proposed. What is the best preparation?

中文翻译：有人提出生产模式变更，最佳准备是什么？

【重点】答案：D | 知识领域：建模与运营

解析：变更需影响分析、测试与恢复路径。A倒置控制，B破坏追踪，C缺乏保证。

【任务】记录题号、所选答案、知识领域与错因，区分英文理解问题和知识判断问题。成绩仅供学习诊断；80%可作为训练目标，不等同于官方通过概率。
